### **A NOTE ON FORWARD-LOOKING STATEMENTS**

*This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.*

*The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.*

## Management Discussion of Fund Performance

June 3, 2019

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended March 31, 2019, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

### Investment Objective and Strategies

The Fund seeks income with some emphasis on capital preservation by investing primarily in fixed income securities issued by companies or governments anywhere in the world, either directly or through other mutual funds.

### Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for short- to medium-term investors looking for a global fixed income fund to hold as part of their portfolio, who can handle the volatility of bond markets and who have a low tolerance for risk.

### Results of Operations

#### Investment Performance

The performance of the Fund's Series PW and Series LW securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the year, the Fund's Series PW securities returned 2.3% (after deducting fees and expenses paid by the series). This compares with the ICE BofAML Global Broad Market (Hedged) Index return of 4.1%. Since inception on December 7, 2018, the Fund's Series LW securities returned 3.3%, which compares with the index return of 3.6% for the same period. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Performance varied across developed global sovereign bond markets. In general, yields on longer-term bonds declined and yield curves flattened as central banks took a more pessimistic view of growth as

the year progressed. Emerging markets stabilized in January after the U.S. Federal Reserve shifted away from monetary tightening, introducing some uncertainty about the strength of the U.S. dollar. The Canadian bond market outperformed the broader global bond market during the year. Despite volatility, the Canadian dollar was relatively strong, benefiting from a solid economic backdrop.

The Fund currently invests all its assets in other funds managed by Mackenzie, and the following discussion reflects the activities of these underlying funds. The Fund underperformed the index, with its shorter duration exposure detracting from performance as high-quality longer-term bonds from developed markets rebounded strongly during the second half of the year. Duration and yield curve positioning within federal bonds also detracted from performance. At a regional level, exposure to emerging market assets, including those of Argentina, Brazil, Turkey and Russia, detracted.

Conversely, security selection and duration positioning within corporate bonds contributed to performance. At a regional level, overweight exposure to Australian, New Zealand and Mexican bonds contributed.

The Fund substantially hedged its foreign currency exposure. However, the remaining unhedged exposure detracted from performance as most currencies held in the Fund depreciated relative to the Canadian dollar.

Over the year, portfolio activity and market effect resulted in new exposure to Qatar and increased exposure to Australia and Japan, while exposure to Canada, the United Kingdom and Poland decreased. At the sector level, exposure to foreign government bonds and provincial bonds increased, while exposure to corporate bonds and term loans decreased. The portfolio management team continually makes tactical adjustments to the Fund's allocations, so the year-end exposures do not necessarily represent a long-term strategic position.

#### Net Assets

The Fund's NAV declined by 26.9% to \$3.1 million at March 31, 2019, from \$4.3 million at March 31, 2018. This change was composed primarily of \$0.1 million in net income (including dividend and interest income) from investment performance, after deducting fees and expenses, and \$1.2 million in net redemptions.

#### Fees and Expenses

The management expense ratio ("MER") for Series PW of 1.28% during the year ended March 31, 2019, was slightly lower than the MER of 1.29% for the year ended March 31, 2018. The annualized MER for Series LW was 1.30% since inception. The MERs (before and after waivers or absorptions, if any) for all series are presented in the *Financial Highlights* section of this report. The MERs for Series PWF8, Series PWF6, Series PWF5, Series PWT5 and Series PWT8 decreased due to a decrease in the management fee rates effective June 1, 2018, as noted in the *Fund Formation and Series Information* section of the report. The MERs for Series PWF5 and PWT5 also decreased due to a decrease in fund costs.

## Recent Developments

In the portfolio management team's view, unless U.S. domestic growth and markets rise significantly, the Federal Reserve is unlikely to raise rates until 2020. Despite the Federal Reserve's change in outlook, the team does not anticipate a recession in 2019, but expects economic activity to pick up. The team believes the European Central Bank and the Bank of Japan will keep monetary conditions accommodative as confidence in their respective economies falters. Both regions should benefit from some relief in trade tensions.

The team believes the Canadian dollar could weaken as a result of global economic growth concerns and a slowing domestic housing market. However, higher oil prices and a U.S.–China trade deal may support the dollar. The team expects the Bank of Canada to continue relying on Canadian economic data but also to consider U.S. monetary policy and interest rate decisions.

## Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

## Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

## Other Related Party Transactions

At March 31, 2019, Mackenzie had an investment of \$15,717 in the Fund (0.5% of the Fund's NAV).

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

## Past Performance

The Fund's past performance information is presented in the following charts and table. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The charts and table do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

## Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

## Annual Compound Returns

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2019. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

- These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the *Notes to Financial Statements*.
- Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

LBC Financial Services Inc. ("LBC") is the principal distributor for the LBC series securities of the Fund (as listed under *Fund Formation and Series Information*) and receives a portion of the management fees that the Fund pays to Mackenzie. Under this arrangement, LBC was entitled to approximately 23% of the total management fees that Mackenzie received from the LBC series of all Mackenzie funds during the year. Mackenzie is responsible for paying all distribution-related payments to LBC-authorized dealers whose clients invest in the LBC series of the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the year to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 23% of the management fees paid by all applicable series of the Fund during the year. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.
