

Interim Management Report of Fund Performance

For the Six-Month Period Ended September 30, 2019

This Interim Management Report of Fund Performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the investment fund. You may obtain a copy of the interim financial report or annual financial statements, at no cost, by contacting us using one of the methods noted under Fund Formation and Series Information or by visiting the SEDAR website at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. For more information, please refer to the Fund's Simplified Prospectus, Annual Information Form and Fund Facts, which may also be obtained, at no cost, using any of the methods outlined above.

For the Fund's current net asset values per security and for more recent information on general market events, please visit our website.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

Management Discussion of Fund Performance

November 12, 2019

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended September 30, 2019, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Results of Operations

Investment Performance

The performance of the Fund's Series A securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the period, the Fund's Series A securities returned 1.8% (after deducting fees and expenses paid by the series). This compares with a return of 4.1% for a blended index composed of a 75% weighting in the Fund's broad-based index, the MSCI World (Net) Index (returned 3.6%), and a 25% weighting in the ICE BofAML Global Broad Market (Hedged) Index (returned 5.2%). All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

While most developed global equity markets posted positive returns over the period, some faced significant challenges from slowing global growth, trade tensions and geopolitical strains such as the potential withdrawal of the United Kingdom from the European Union. However, these same challenges benefited developed global bond markets, which posted strong returns. Yield curves flattened, and even inverted, as central banks in many developed countries lowered interest rates or debated policies to support economic growth. In emerging markets, bond performance varied greatly, and currencies depreciated relative to the Canadian dollar. High-yield bond markets performed well, driven by higher-quality bonds with longer duration.

Within the MSCI World (Net) Index, Switzerland, the Netherlands and Australia were the strongest-performing countries in Canadian dollar terms, while Hong Kong, Israel and Austria were the weakest. From a sector perspective, utilities, information technology and consumer staples were the strongest performers, while energy, health care and materials were the weakest.

The Fund currently invests all its assets in Mackenzie Ivy Global Balanced Fund (the "Underlying Fund"). The Fund underperformed both the broad-based index and the blended index because of the performance of the Underlying Fund's equity portfolio. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.

Within the equity portion of the Underlying Fund, stock selection in the industrials sector and underweight exposure to information technology detracted from performance. At a country level, stock selection in Australia detracted. Conversely, an overweight position and stock selection in the consumer staples sector contributed to performance, as did stock selection in health care. At a country level, stock selection in the United States contributed.

Within the fixed income portion of the Underlying Fund, a short duration position detracted from performance as longer-term bonds posted the largest gains. Underweight exposure to European bonds detracted as the region's bond markets rallied sharply on deteriorating economic growth. Certain emerging market exposures also detracted, such as Argentina, which fell on the threat of a change in government and a rising risk of default. The Fund's holdings in term loans detracted from performance as they have short duration and are below investment grade quality. Conversely, overweight exposure to Australian and Mexican bonds contributed to performance.

The Underlying Fund partially hedged the foreign currency exposure of its equity portfolio, which contributed to performance primarily as the U.S. dollar depreciated relative to the Canadian dollar. The Underlying Fund substantially hedged the foreign currency exposure of its fixed income portfolio. However, the remaining unhedged exposure detracted from performance as most currencies held in the portfolio depreciated relative to the Canadian dollar.

The Underlying Fund held put options on high-yield bonds and long-term government bonds to help manage credit risk exposure, which had no significant impact on performance. The Underlying Fund's futures positions, used to manage fixed income duration, detracted from performance. Currency options, held tactically during the period, had no significant impact on performance. The Underlying Fund also held swaps to gain exposure to or mitigate the risks of certain interest rate exposures, which had no significant impact on performance.

Over the period, portfolio activity and market effect in the Underlying Fund resulted in increased exposure to fixed income and equities, while cash decreased. Exposure to the United States and Japan increased, and exposure to the United Kingdom and Hong Kong decreased. Within the equity portion of the Underlying Fund, exposure to the consumer staples and information technology sectors increased, while exposure to consumer discretionary and health care decreased. Changes to the equity portfolio included the elimination of the position in Healthcare Services Group Inc. Within the fixed income portion of the Underlying Fund, exposure to foreign government bonds increased.

MACKENZIE IVY GLOBAL BALANCED CLASS

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2019

BALANCED FUND

Net Assets

The Fund's NAV increased by 7.2% to \$99.7 million at September 30, 2019, from \$93.0 million at March 31, 2019. This change was composed primarily of \$2.1 million in net income (including dividend and interest income) from investment performance, after deducting fees and expenses, \$5.3 million in net sales, and \$0.6 million in cash distributions.

Fees and Expenses

The annualized management expense ratio ("MER") for Series A of 2.34% during the period ended September 30, 2019, was unchanged from the MER for the year ended March 31, 2019. The MERs (before and after waivers or absorptions, if any) for all series are presented in the *Financial Highlights* section of this report. The MER for Series PWFB5 decreased due to a decrease in fund costs.

Recent Developments

On July 19, 2019, Nelson Arruda of the Mackenzie Multi-Asset Strategies team assumed responsibility from Alain Bergeron for asset mix decisions of the Underlying Fund.

The equity portfolio management team of the Underlying Fund believes market valuations remained elevated at the end of the period, reflecting corporate profitability that could be approaching peak – or near-peak – levels, as measured by cyclically adjusting the operating margins of the companies the team researches. As a result of the team's belief that the valuations of a number of the Underlying Fund's holdings had reached elevated levels, the team trimmed some of these positions.

The fixed income portfolio management team of the Underlying Fund believes the Federal Reserve would prefer to keep the federal funds rate at current levels unless U.S.–China trade negotiations do not progress smoothly. Overall, the team expects economic activity to improve as lower yields provide some stimulus. The team believes the European Central Bank and the Bank of Japan will keep monetary conditions accommodative because confidence in their economies is faltering. The team believes both regions may benefit from relief in trade tensions.

Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

Other Related Party Transactions

At September 30, 2019, Mackenzie had an investment of \$8,059 in the Fund (less than 0.1% of the Fund's NAV).

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

Net assets, end of period	14.65	15.30	n/a	n/a

- These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the *Notes to Financial Statements*.
- Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 47% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series. The higher proportion of distribution-related payments is primarily attributable to sales commissions related to gross sales of redemption charge securities of the Fund.

Fund Formation and Series Information

The Fund may have undergone a number of changes, such as a reorganization or a change in manager, mandate or name. A history of the major changes affecting the Fund in the last 10 years can be found in the Fund's Annual Information Form.

Date of Formation September 29, 2016

The Fund may issue an unlimited number of securities of each series. The number of issued and outstanding securities of each series is disclosed in *Financial Highlights*.

Series Offered by Mackenzie Financial Corporation (180 Queen Street West, Toronto, Ontario, M5V 3K1; 1-800-387-0614; www.mackenzieinvestments.com)

Series A, Series T5 and Series T8 securities are offered to retail investors investing a minimum of \$500 (\$5,000 for Series T5 and Series T8). Investors in Series T5 and Series T8 securities also want to receive a monthly cash flow of 5% or 8% per year, respectively. Before January 1, 2019, Series T5 securities were known as Series T6.

Series D securities are offered to retail investors investing a minimum of \$500 through a discount brokerage or other account approved by Mackenzie.

Series F, Series F5 and Series F8 securities are offered to investors who are enrolled in a dealer-sponsored fee-for-service or wrap program, who are subject to an asset-based fee rather than commissions on each transaction and who invest at least \$500 (\$5,000 for Series F5 and Series F8); they are also available to employees of Mackenzie and its subsidiaries, and directors of Mackenzie. Investors in Series F5 and Series F8 securities also want to receive a monthly cash flow of 5% or 8% per year, respectively. Before January 1, 2019, Series F5 securities were known as Series F6.

Series FB and Series FB5 securities are offered to retail investors investing a minimum of \$500. Investors are required to negotiate their advisor service fee, which cannot exceed 1.50%, with their financial advisor. Investors in Series FB5 securities also want to receive a monthly cash flow of 5% per year.

Series PW, Series PWT5 and Series PWT8 securities are offered through our Private Wealth Solutions to certain high net worth investors who invest a minimum of \$100,000. Investors in Series PWT5 and Series PWT8 securities also want to receive a monthly cash flow of 5% or 8% per year, respectively. Before January 1, 2019, Series PWT5 securities were known as Series PWT6.

Series PWFB and Series PWFB5 securities are offered through our Private Wealth Solutions to certain high net worth investors who invest a minimum of \$100,000. Investors are required to negotiate their advisor service fee, which cannot exceed 1.50%, with their financial advisor. Investors in Series PWFB5 securities also want to receive a monthly cash flow of 5% per year.

Series PWF and Series PWF8 securities are no longer available for sale. Effective June 1, 2018, Series PWF and Series PWF8 securities were consolidated into Series F and Series F8 securities, respectively.

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option and various low-load purchase options. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.
