PORTFOLIOS**

What if you could get a professionally constructed and managed portfolio in **one simple package? With Mackenzie FuturePath portfolios, you get all the benefits:**

Diversified mix of asset classes, managers, countries, industries and investment styles for performance potential no matter what the future brings.

Constructed using a combination of mutual funds, ETFs and options.

Professionally managed by Mackenzie Investments plus external partners.

Rebalancing, monitoring, administration and reporting included.

Sophisticated portfolio construction to optimize return for risk.

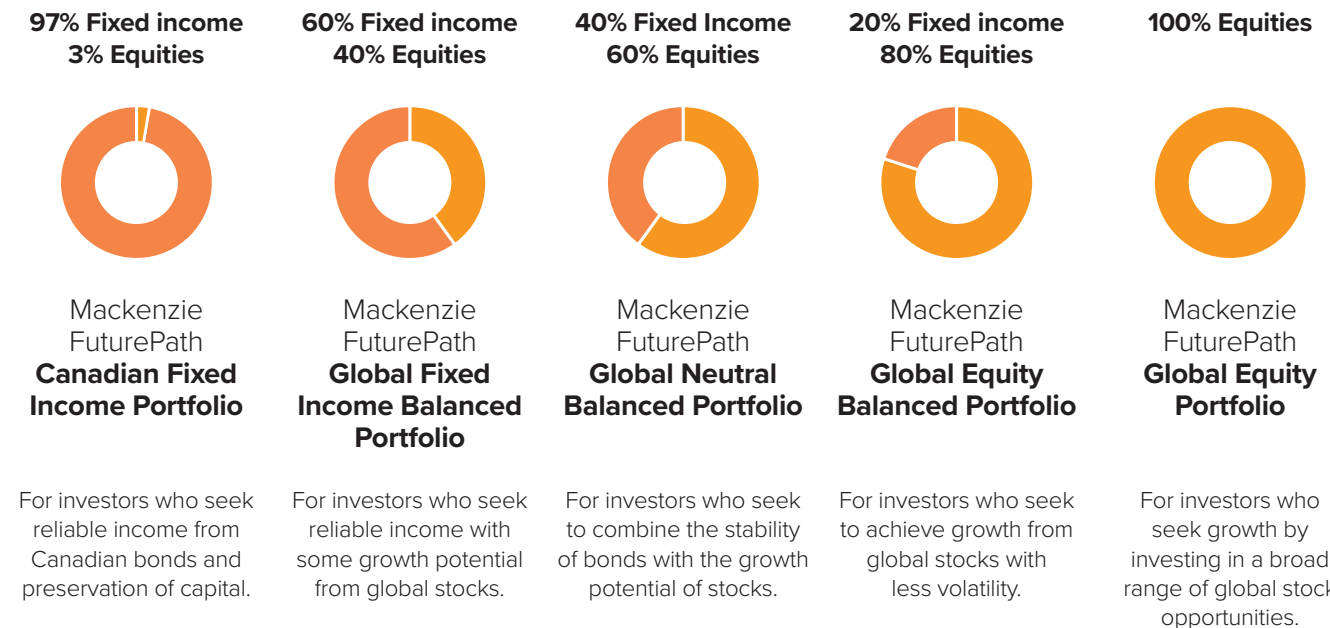

Options to suit a variety of investor goals, profiles and life stages, including retirement income solutions.

Multi-Asset Portfolios

Simple on the outside, complex and hard-working on the inside.

Our hands-free investment solutions may look simple. But they are, in fact, packed with complex strategies and advanced expertise. Designed and constructed by Mackenzie's multi-asset strategy team, each portfolio contains multiple asset classes, geographies, investment managers, strategies and styles, combined for optimal performance potential. We offer five models that cater to a variety of investor profiles, depending on their specific needs, priorities, sensitivity to risk and timeline.

Monthly Income Portfolios

Three ways to spend a well-earned retirement.

For investors who need monthly cash flow in retirement, we manage their investments while balancing three very important objectives.

- 1 MONTHLY INCOME** Receive a 5% fixed rate monthly distribution from dividends, bond interest, capital gains and return of capital when needed.
- 2 GROWTH** Capture the higher return potential of equities to increase the longevity of retirement assets.
- 3 SAFETY** Rely on sophisticated strategies aimed at protecting capital during market downturns.

MACKENZIE FUTUREPATH FUNDS

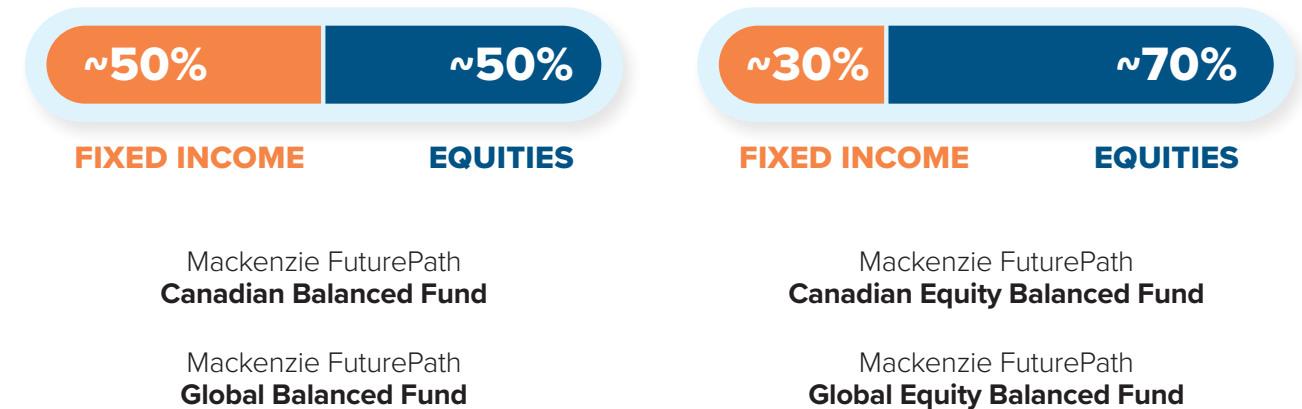

Build just the portfolio you need with **20** unique funds.

Balanced funds

Stocks and bonds together, for a solid foundation.

A well-diversified, balanced fund can be an ideal building block or foundation for a portfolio. With a solid starting point, you can then customize the portfolio, adding funds to emphasize other markets, asset classes or investment styles, while being confident that you have all the bases covered. Balanced funds combine Mackenzie's strongest equity boutiques with our fixed income boutique.

Note: Target weightings are for illustrative purposes only. Actual percentage weightings may differ. Please read the prospectus for full details before investing.

Equity funds

Share in the wealth of leading companies.

What if you could give your clients the chance to “own” a company like Apple or Nike or CN Rail? Investing in equity funds gives individuals the opportunity to have a small ownership stake in large companies and benefit from their success.

When a company's shares increase in value, so does your client's investment. Over time, stocks have shown strong growth potential when held for the long-term. And through mutual funds, every dollar invested buys a piece of every stock in the portfolio. So each investor becomes a part-owner of many companies, which is safer than having all of their money riding on a few stocks.

Mackenzie FuturePath gives you access to the specialized expertise of a wide range of renowned stock pickers, both inside and outside of Mackenzie. Choose from equity funds managed by Mackenzie's own Bluewater, Betterworld, North American Equity & Income, Global Equity & Income, and Global Quantitative Equity boutiques, as well as managers such as T. Rowe Price, 1832 Asset Management and Brandywine.

Your choice of 13 equity funds.

What's your investing style?

VALUE

GEMS IN THE ROUGH

Value funds seek high-quality companies that are thought to be priced below what they are really worth.

CORE

A SOLID CHOICE

Core funds use major asset classes and fundamental investment strategies to form the foundation of a long-term portfolio.

GROWTH

REACHING FOR THE STARS

Growth funds use a stock-picking strategy focused on fast-growing companies with high future potential.

SUSTAINABLE

INVESTING WITH PURPOSE

Sustainable funds invest in companies that have a positive impact on society or the environment, and as part of their investment process, may exclude certain industries.

Fixed income funds

Bonds build bridges and attract interest.

Ever wonder how the building of a bridge, school or factory is financed? These projects by governments and large corporations require far more money than the average bank can provide. With bonds, thousands of individual investors take on the role of lender. And in return, they earn a fixed stream of interest income for a set period of time.

In a bond mutual fund, your client becomes part-owner of hundreds of bonds, each hand-picked by the portfolio manager for credit quality, and representing a diverse range of countries, industries and issuers. Bonds are a stable foundation of any portfolio, with the ability to offset the impact of stock market fluctuations in the equity component of the portfolio.

Mackenzie FuturePath draws on the expertise and experience of Mackenzie's Fixed Income boutique, a leading innovator that looks beyond traditional bond strategies to provide the solutions that investors need today and tomorrow.
